

Ethernet / IP Registration Form

Registration of ethernet-connected equipment has advantages such as:

- the machine will always get the same IP address from a departmental ethernet port, and will therefore be reachable by name from anywhere on the Internet
- if a machine misbehaves in a way that interferes with network services (e.g. catches a virus and starts probing or spamming) it is easier/faster for us to track it down.

Please fill out **one form per machine** and return to the Computing Unit.

Ethernet connectivity can be used for good and evil, so it carries some responsibility.

Please do not sign this form unless you agree to the following:

- I will read UBC's policy on the Responsible Use of Information Technology (at <http://www.universitycounsel.ubc.ca/policies/policy104.pdf>)
- I will do my best to ensure that no person uses my network-connected machine to gain unauthorized access to any site on the Internet, or to carry out unlawful activities on any site on the Internet.
- I will notify the network manager (e-mail: **nic@zoology.ubc.ca**) before changes are to be made to any of the information supplied below.

1. I agree to the above. (machine user): _____
(sign)

_____ (date) _____ (print)

2. your e-mail address: _____

3. my cool/interesting name for this machine: _____

4. make and model of machine: _____

5. operating system (Windows, MacOS X, Linux): _____

6. version of the operating system: _____

7. location of this machine (building and room number): _____

8. CCT port number (of jack on wall, e.g. CCT092130): _____

9. hardware ethernet address (e.g. 00:01:03:27:2d:27): _____

Comments:

For Computing Unit use

Assigned IP#: _____ Date: _____
